“You could never call a hand dryer beautiful, but we have made every effort to build something pleasing on the eye that works on all levels”

#### Introduction into hand drying and our hand dryers

Commercial hand dryers have benefited from advances in technology and within a matter of years, hand dryers have become super efficient, more cost effective and kinder to our environment in terms of overall carbon footprint.

As with most things in life hand dryers come in many different shapes and sizes each with their own attributes and values. With this in mind we created a simple brochure which allows you the user to choose what you need from a hand dryer. We have stripped away the jargon and replaced it with simple dials and symbols.

Veltia have been manufacturing hand dryers since 2008. The Spanish company continues to produce its design led products in the heart of Barcelona using manufacturers located in the same geographic area to provide them with all components.

Exporting to more than 81 countries worldwide, Veltia hand dryers are sold into every market sector from manufacturing to blue chip, airports to retail.

# V7 Tri-Blade

## Technical Specifications

Voltage	Voltage 220/240v - / 50Hz
Power	1,760 W (8 A)
Net Weight	9.55 Kg
Dimensions (D x W x L)	195 x 300 x 617mm
Noise Level	78dB at 1m
Cover Options	ABS Plastic Polymer

\* Tech Spec subject to change without previous notice. \*\* Calculations based on 120 uses a day | Based on manufacturer's stated figures.

## “Hand drying in under 10 seconds”

### Overview

3 blades of air strategically placed to dry your hands in under 10 seconds. Water collection as standard as well as Microban antimicrobial protection, impregnated at the manufacturing stage Microban inhibits the growth of bacteria, mould and mildew.

Microban treated products are tested for their efficacy in accordance with Internationally recognised standards.

Available in 13 colours the Tri-Blade is also fully compatible with ZeroGel a neutralising gel pack which eliminates bad odours and leaves the user with a heightened washroom experience.

## “Optimum water collection and comfortable hand drying”

### Overview

300 jets of air strategically placed to remove the water from both sides of your hands without the need for continuous hand movement.

The V7-300 gives the user a comfortable hand drying experience whilst the 300 jets 'massage' the hands dry.

Water collection as standard as well as Microban antimicrobial protection, impregnated at the manufacturing stage Microban inhibits the growth of bacteria, mould and mildew. Microban treated products are tested for their efficacy in accordance with Internationally recognised standards.

Available in 13 colours the V7-300 is also fully compatible with ZeroGel a neutralising gel pack which eliminates bad odours and leaves the user with a heightened washroom experience.

## “Robust and designed for life, the World Dryer brand speaks for itself”

### Overview

VERDEdri™ is a high speed, surface-mounted DDA compliant (protrudes from the wall 100mm or less) hand dryer featuring HEPA filtration system and antimicrobial technology.

VERDEdri was designed to be durable and vandal resistant, to cope with all environments and footfall situations. The user is given added protection and comfort as VERDEdri incorporates SteriTouch® antimicrobial technology inhibiting the growth of bacteria, mold and fungus extending the dryer's service life.

## “Noise and power adjustment allow this dryer to adapt to any environment”

### Overview

Thanks to a unique external adjustment the F1 Eco gives the user the ability to increase or decrease both the power and noise level, therefore adapting to its environment.

Internally the F1 Eco benefits from switchable heating allowing the user to gain a further reduction in energy consumption.

A blue guidance light indicates where hands gain optimum drying position whilst an LED display indicates to the user when the dryer is active.
